# NATURAL HISTORY

But Peter was bad.

The orbits of the planets, (both yellow), Earth (white) of more than 30,000 astronomical diameters. Encke's comet has a smaller orbit and shorter period (3.3 years) for than any other comet. The orbits of the five outer planets (green), with Jupiter, Saturn, Uranus, and Pluto. Halley's comet appears every 77 years; its orbit is shown in four million miles.

shows the paths of the inner planets, Mercury and Venus, and Jupiter (green). Between Mars and Jupiter lies a belt of asteroids, the largest of which, Ceres (purple line), is only 480 miles in diameter. The planets, from center, are Jupiter, Saturn, Uranus, and Pluto. Halley's comet appears every 77 years; its orbit is shown in four million miles. The orbits of the five outer planets (green), with Jupiter, Saturn, Uranus, and Pluto. Halley's comet appears every 77 years; its orbit is shown in four million miles.

# LIFE SPREADS TO THE LAND

Hey man,  
I'm lookin'  
for a hunk!  
And he's  
gotta be  
hung!!!

that mosquitoes suck  
No one needs to be told

of course, dies.

TIME OF TRIAL AND TRIUMPH

the sap of the tree.  
the bark,  
the tree

Its legs were thick

on plant juices.

for them to ripen.

They eat up one another. It is not at all unusual
